

About CAMELS VT

Camels Vision Technologies Incorporated is an ODM (original design manufacturer) providing a variety of support services related to design, manufacturing, and after-sales service for professional imaging products. Our client base consists of branded companies, machine builders/OEM, defense and space agencies.

Why should you consider our services for your next project?

Firstly, there are our quality standards. One of key features of our products is 3-year limited hardware warranty, even for our cost-effective CCTV cameras. All our products are made in Taiwan, under strict CE or FCC compliance and factory burned-in at least 48 hours. We feel confident in offering long-term guarantees for all our work.

Secondly, we promise excellent ODM project management and cost control. We don't just provide manufacturing service, we offer custom-designed and after-sales services as well for our valuable ODM customers. We welcome you to propose your requirements and share in the process of developing products customized specifically for your application.

Thirdly, there's our expertise. Our technical team represents broad disciplines of machine-vision and imaging industries: optics, electronics, FPGA/DSP, software, mechanics and small-lot production. We have chosen to specialize in building cameras, video platform and application algorithms so we have excellent knowledge of this area.

Please contact us to discuss your imaging requirements. For further information about CAMELS VT, please see us on the web www.camels.com.tw or contact us at info@camels.com.tw.

Company's products/services

1. Machine-vision cameras (area & linescan)
2. High-end security cameras
3. DSP video boards for demanding defense and aerospace markets
4. Vision modules for the photovoltaic industry
5. ODM projects for professional imaging products
